

Government Required Disclaimer and Risk Disclosure

DISCLAIMER

Commodity Futures Trading, Forex, Futures, Options, CFD, and trading on margin has large potential rewards, but also large potential risk. You must be aware of the risks and be willing to accept them in order to invest in financial markets. Don't trade with money you can't afford to lose. No representation is being made that any account will or is likely to achieve any level of profits. The past performance of any trading system or methodology is not a guarantee and is not indicative of future results.

HYPOTHETICAL OR SIMULATED PERFORMANCE

Hypothetical and simulated trading results have certain limitations. Unlike an actual performance record, simulated results do not represent actual trading. Also, since the trades have not been executed, the results may have under or over compensated for the impact, if any, of certain market factors, such as lack of liquidity, slippage, etc. Simulated trading programs in general are also subject to the fact that they are designed with the benefit of hindsight. No representation is being made that any account will or is likely to achieve profit similar to those shown and/or those discussed within the scope of the promotional information or material. The information, course(s), product(s), or services provided by GTS should be used as learning and informational aids only and should not be used to invest real money. If you decide to invest real money, all trading decisions should be your own. Unique experiences and past performances do not guarantee future results. Testimonials, which may from time to time refer to the material herein, are non-representative of all clients and some accounts may have worse performance than those indicated.

RISK DISCLOSURE

Trading in financial markets or any securities in general involves substantial risk and there is always the potential for loss of capital. Additionally, because the risk factor is higher when trading on margin, only genuine "risk" capital should be used in such trading. If you do not have the extra capital that you can afford to lose, you should not trade in any financial market. GTS does not represent that the material and information, which is the subject matter of this Risk Disclosure, constitutes a "safe" trading system, and no one can guarantee profits or freedom from loss.

INTERNET TRADING RISKS

In addition, there are risks associated with utilizing an Internet-based deal execution trading system including, but not limited to, the failure of hardware, software, and Internet connection. Since GTS does not control signal power, its reception or routing via Internet, configuration of your equipment or reliability of its connection, we cannot be responsible for communication failures, distortions or delays when trading via the Internet.
